

# Load Controls PMP-25 Calibration Service

*By Factory-Scaling and calibrating your PMP-25 you can improve sensor accuracy, simplify installation, and receive a calibration certificate with NIST traceability.*

## What the PMP-25 Calibration Service is:

- We set the Full-Scale of the PMP-25 at the factory to match your motor size and efficiency
- We provide scaled RangeFinder™ Toroid that is matched to the serial number of the PMP-25
- We provide a Calibration Certificate that is based on NIST-traceable measurement equipment

## The Benefits of the PMP-25 Calibration Service:

- Improve overall accuracy of the PMP-25 for your specific application
- Faster, simpler installation
- NIST-traceable baseline of calibration for process documentation, process audits and regulated industries

## Price:

- New Controls - \$225.00
- Existing Controls/RangeFinder™ Toroids returned to Factory - \$275.00
