

ADDENDUM PMP-25-SK

(Pump Monitor with Sinking Output)

4-20 MILLIAMP ANALOG OUTPUT

The Analog output is directly proportional to the Full Scale Capacity. It is always active. Maximum applied voltage is 28 VDC.

* Terminal 2	4-20 Ma	Positive
* Terminal 3	4-20 Ma	negative

Use twisted pair shielded cable. Ground shield at one end. For full Scale Capacity to calibrate to calibrate external meters,computers,etc refer to the manual.
